Specifications and Precautions of Patented Rock-Pressed Board Series Products

The patented rock-pressed board has a uniform size of 4 feet by 9.5 feet.

The main ingredients of the patented rock plate series products: calcium carbonate, epoxy resin
Patented rock board adhesive materials cannot contain high toluene and high formaldehyde ingredients

Patented Rock Plate Series Product Description

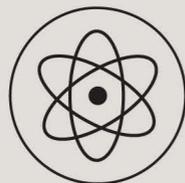

The patented rock plate series products are the latest cutting-edge environmentally friendly building materials on the market. Its materials are a substitute stone A53 artificial cultural stone made from a variety of natural stone powders from the ground. It is not only environmentally friendly and healthy, but also beautiful and lifelike. It uses high 22:36 North meters, divided into rooms, scratch-resistant, pollution-resistant, corrosion-resistant, heat-resistant and cold-resistant.

Patented Rock Plate Series Product Description

The patented rock-pressed board series products are the latest cutting-edge environmentally friendly building materials on the market. They are made of artificial cultural stones made from a variety of natural stone powders from various mines, which are not only environmentally friendly and healthy, but also beautiful and lifelike. They use high-end rock-pressed technology, are wear-resistant, scratch-resistant, pollution-resistant, corrosion-resistant, heat-resistant and cold-resistant, and are the pioneer materials leading international building materials.

Patented Rock-Pressed Board Series Products are Applicable to

Suitable for home decoration background wall, industrial decoration, villa, KTV, hotel, cafe, bar, club, and can also be used in public places, shopping malls and other public areas Wall and background wall.

Pressure Technology

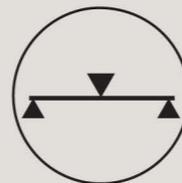

Convenient Construction

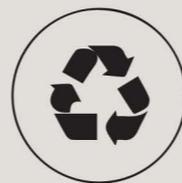

Fireproof Material

Zero Formaldehyde

Long Life
